Career Objective

Software Engineer with nearly 4 years of experience across frontend, backend, mobile, and AI-driven solutions.

Strong passion for frontend development and user experience, while also adept at building scalable backend systems and exploring emerging technologies.

Skilled in modern frameworks and tools, delivering high-quality, responsive, and performant applications. Eager to contribute versatile expertise to innovative projects and help drive business success.

Skills

Soft Skills

- Problem-solving
- Collaboration
- Communication
- Attention to detail
- Time management

Frontend Development

- HTML
- CSS / SASS
- JavaScript / TypeScript
- React / Next
- Svelte / SvelteKit

Mobile Development

- React Native
- Flutter

State Management

- Redux
- Zustand

Backend Development

- Node.js
- Express.js
- Nest.js
- Python (Django, FastAPI)

Database

- PostgreSQL
- MongoDB

Other Tools

- Git
- GitHub / GitLab
- Figma
- Postman
- AWS

Work Experience

SM Supermalls (2024 December – Present)

- **Project:** SM Malls Online
 - Provided maintenance and support for microsite features within the mobile application.
 - Developed the Mall Guide feature, enabling users to easily search and locate store tenants in a specific mall.
 - Supported the Coupons feature, allowing users to redeem vouchers and apply discounts on their purchases across the mall.
 - Implemented enhancements and adjustments to the mobile application itself beyond microsite features.
- **Project:** Proof of Concepts (POCs)
 - In-App Messaging System – Built a real-time messaging feature using WebSockets for seamless communication within the app.
 - Mall Directory with Navigation – Developed an interactive 2D/3D map that guides users through malls with turn-by-turn directions.
 - AI-Powered CCTV Analytics – Implemented a visitor counting system using computer vision to detect and track unique individuals.

- eKYC Solution – Created an AI-driven identity verification process that validates IDs and uses OCR to extract text accurately.

UBX Philippines Corporation (2023 March – 2024 December)

- Junior Software Engineer
- **Project:** SeekCap
 - Provided maintenance support for the project.
 - Proficient in deploying frequent enhancements to the platform, covering a spectrum of features.
 - Instrumental in addressing and resolving bugs, ensuring the app's reliability, and enhancing the overall user experience.
 - Tools: React, AWS Cloudwatch, Postman
- **Project:** CashBux Remittance
 - Developed a proof of concept (POC) mobile application for the CashBux remittance feature.
 - Integrated with PAX A920 device to facilitate secure and efficient remittance transactions.
 - Developed working knowledge of Kotlin specifically to implement a package that integrates the device's printing functionality.
 - Tools: React Native, TypeScript, Kotlin, PAX A920
- **Projects:** BUx, Sentro, i2i
 - Handled tickets for these projects as needed due to resource constraints.
 - Tools: React.js, Redux.js, Python (Django)

Datawords (2022 January – May)

- Digital Specialist (Intern)
- Executed web mastering responsibilities as a digital specialist, utilizing Salesforce to enhance, customize, and localize e-commerce websites for a variety of clients.

Wear Forward (2021 August – December)

- Technology Engineer (Intern)
- Served as a Full Stack Web Developer and designed user interfaces.
- Engaged in discussions to plan the startup company's online platform.
- Collaborated with co-workers to design and implement the company's website, incorporating its carbon footprint calculator feature.
- Executed the design, build, and deployment phases using NextJS, Figma, and Git.

Education

- Information and Communications Technology Academy (iACADEMY)
 - Bachelor of Science in Information Technology (2018 – 2022)
